

Dr. Mohammad Taleghani is Associate Professor of Landscape Architecture, in Leeds Beckett University, UK.

He has worked previously at University of Southern California in Los Angeles (USA), Portland State University (USA), and University of Salford (Manchester).

His primary focus in research is on the impact of the urban heat islands on human thermal comfort, and energy consumption of buildings. Mohammad received prestigious grants from European Regional Development Fund (ERDF), and the United States National Science Foundation (NSF). He has published numerous papers in prominent journals in the field of built environment.
